Anlage 45 (zum Datenbericht Mindestanforderungen gemäß § 23 StandAG und geowissenschaftlichen Abwägungskriterien gemäß § 24 StandAG)

Schichtenverzeichnis Bohrung Edesheim 1

Stand 21.09.2020

Hinweis:

Vorliegender Datenbericht zeigt alle entscheidungserheblichen Daten, die mit Stand 07.09.2020 gemäß den Regelungen und Verfahren nach dem Geologiedatengesetz veröffentlicht werden können. Siehe auch BGE 2020I Teil 3 von 4.

Entscheidungserhebliche Daten und Tatsachen für die geowissenschaftlichen Abwägungskriterien

Die Veröffentlichung von entscheidungserheblichen Tatsachen und Erwägungen, hier geologische Daten, erfolgt nach dem Gesetz zur staatlichen geologischen Landesaufnahme sowie zur Übermittlung, Sicherung und öffentlichen Bereitstellung geologischer Daten und zur Zurverfügungstellung geologischer Daten zur Erfüllung öffentlicher Aufgaben (Geologiedatengesetz – GeolDG).

Das GeolDG löst das Lagerstättengesetz ab und nach § 1 GeolDG (GeolDG) regelt es die staatliche geologische Landesaufnahme, die Übermittlung, die dauerhafte Sicherung und die öffentliche Bereitstellung geologischer Daten sowie die Zurverfügungstellung geologischer Daten zur Erfüllung öffentlicher Aufgaben, um den nachhaltigen Umgang mit dem geologischen Untergrund gewährleisten und Geogefahren erkennen und bewerten zu können. Geologische Daten werden insbesondere auch für das Standortauswahlverfahren nach dem Standortauswahlgesetz (StandAG) benötigt.

Das GeolDG trat mit dem 30.06.2020 in Kraft, so dass seitens der BGE, den Landesministerien und Landesbehörden ab diesem Zeitpunkt mit den Verfahren nach dem GeolDG zur Kategorisierung und öffentlichen Bereitstellung geologischer Daten begonnen werden konnte. Die erforderlichen Verfahren waren aufgrund ihres Umfangs nicht in dem bis zur Veröffentlichung bestehenden Zeitraum umzusetzen. Insofern werden nach dem 28.09.2020 weitere geologische Daten veröffentlicht werden. Die Veröffentlichung erfolgt mit Hilfe einer Revision des vorliegenden Datenberichtes. Dabei werden die bisher im vorliegenden Bericht weiß abgedeckten Bereiche nicht weiter abgedeckt, sondern die „darunter liegenden“ Daten sichtbar gemacht.

Mit diesen Anlagen sind der untersetzenden Unterlage (BGE 2020I) die entscheidungserheblichen Daten zu den Mindestanforderungen und geowissenschaftlichen Abwägungskriterien angefügt. Die darin angegebenen Koordinaten beziehen sich dabei immer auf die den identifizierten Gebieten und Teilgebieten zugrundeliegenden Daten und beschreiben damit nicht zwingend das Teilgebiet selbst.

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for this increase in the number of people employed in the public sector. One of the main reasons is the increasing demand for health care services. The population of the UK is ageing, and there is a growing number of people with chronic conditions who require long-term care. This has led to an increase in the number of people employed in health care, particularly in the public sector.

Another reason for the increase in the number of people employed in the public sector is the increasing demand for social care services. The population of the UK is ageing, and there is a growing number of people who require long-term care. This has led to an increase in the number of people employed in social care, particularly in the public sector.

A third reason for the increase in the number of people employed in the public sector is the increasing demand for education services. The population of the UK is growing, and there is a growing number of people who require education. This has led to an increase in the number of people employed in education, particularly in the public sector.

There are a number of challenges facing the public sector in the UK. One of the main challenges is the increasing demand for health care services. The population of the UK is ageing, and there is a growing number of people with chronic conditions who require long-term care. This has led to an increase in the number of people employed in health care, particularly in the public sector.

Another challenge facing the public sector is the increasing demand for social care services. The population of the UK is ageing, and there is a growing number of people who require long-term care. This has led to an increase in the number of people employed in social care, particularly in the public sector.

A third challenge facing the public sector is the increasing demand for education services. The population of the UK is growing, and there is a growing number of people who require education. This has led to an increase in the number of people employed in education, particularly in the public sector.

There are a number of ways in which the public sector can meet these challenges. One way is to increase the number of people employed in the public sector. This can be done by recruiting more people to the public sector and by providing training and development opportunities for existing staff. Another way is to improve the efficiency of the public sector. This can be done by reducing costs and by improving the quality of services.

The first part of the document discusses the importance of maintaining accurate records of all transactions. This is essential for ensuring the integrity of the financial statements and for providing a clear audit trail. The second part of the document outlines the various methods used to collect and analyze data, including interviews, focus groups, and surveys. The third part of the document presents the results of the data analysis, highlighting the key findings and their implications for the organization. The final part of the document provides a summary of the research and offers recommendations for future research and practice.

The research was conducted in a systematic and rigorous manner, following the principles of scientific inquiry. The data were collected from a representative sample of the population and were analyzed using a variety of statistical techniques. The results of the research are presented in a clear and concise manner, making them easy to understand and interpret. The findings of the research have important implications for the organization and for the field of research as a whole.
