Anlage 9 (zum Datenbericht Mindestanforderungen gemäß § 23 StandAG und geowissenschaftlichen Abwägungskriterien gemäß § 24 StandAG)

Schichtenverzeichnis Bohrung Staffhorst Z9

Stand 21.09.2020

Hinweis:

Vorliegender Datenbericht zeigt alle entscheidungserheblichen Daten, die mit Stand 07.09.2020 gemäß den Regelungen und Verfahren nach dem Geologiedatengesetz veröffentlicht werden können. Siehe auch BGE 2020I Teil 3 von 4.

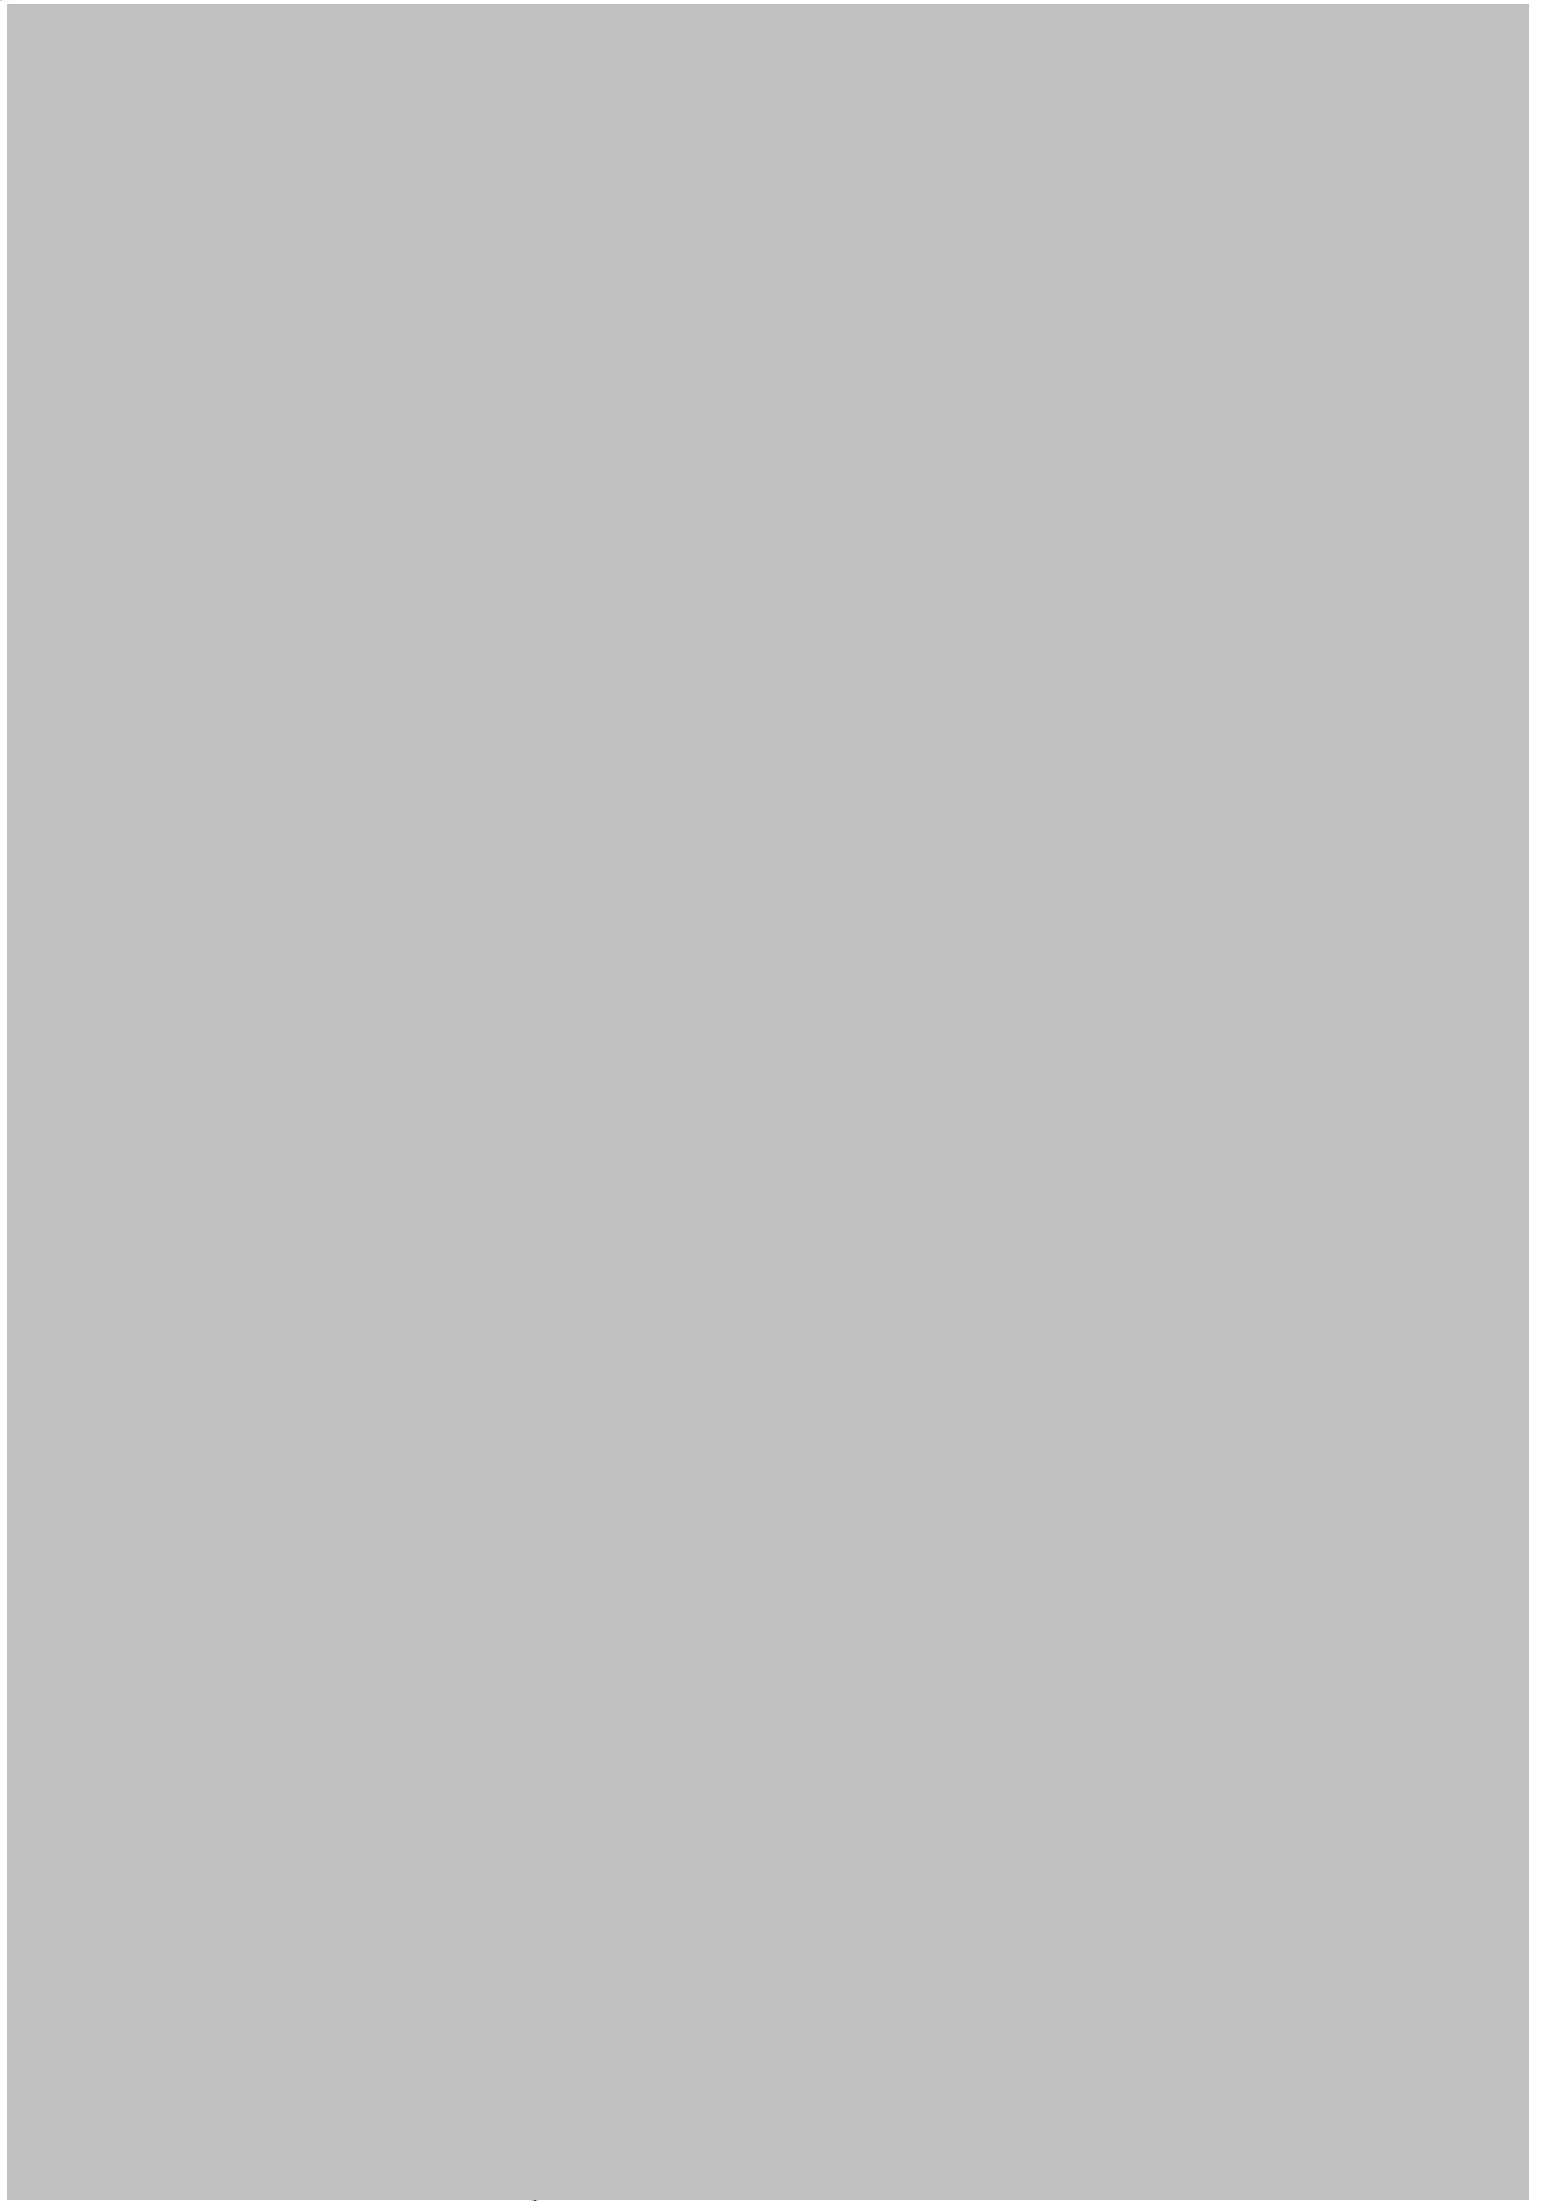

Entscheidungserhebliche Daten und Tatsachen für die geowissenschaftlichen Abwägungskriterien

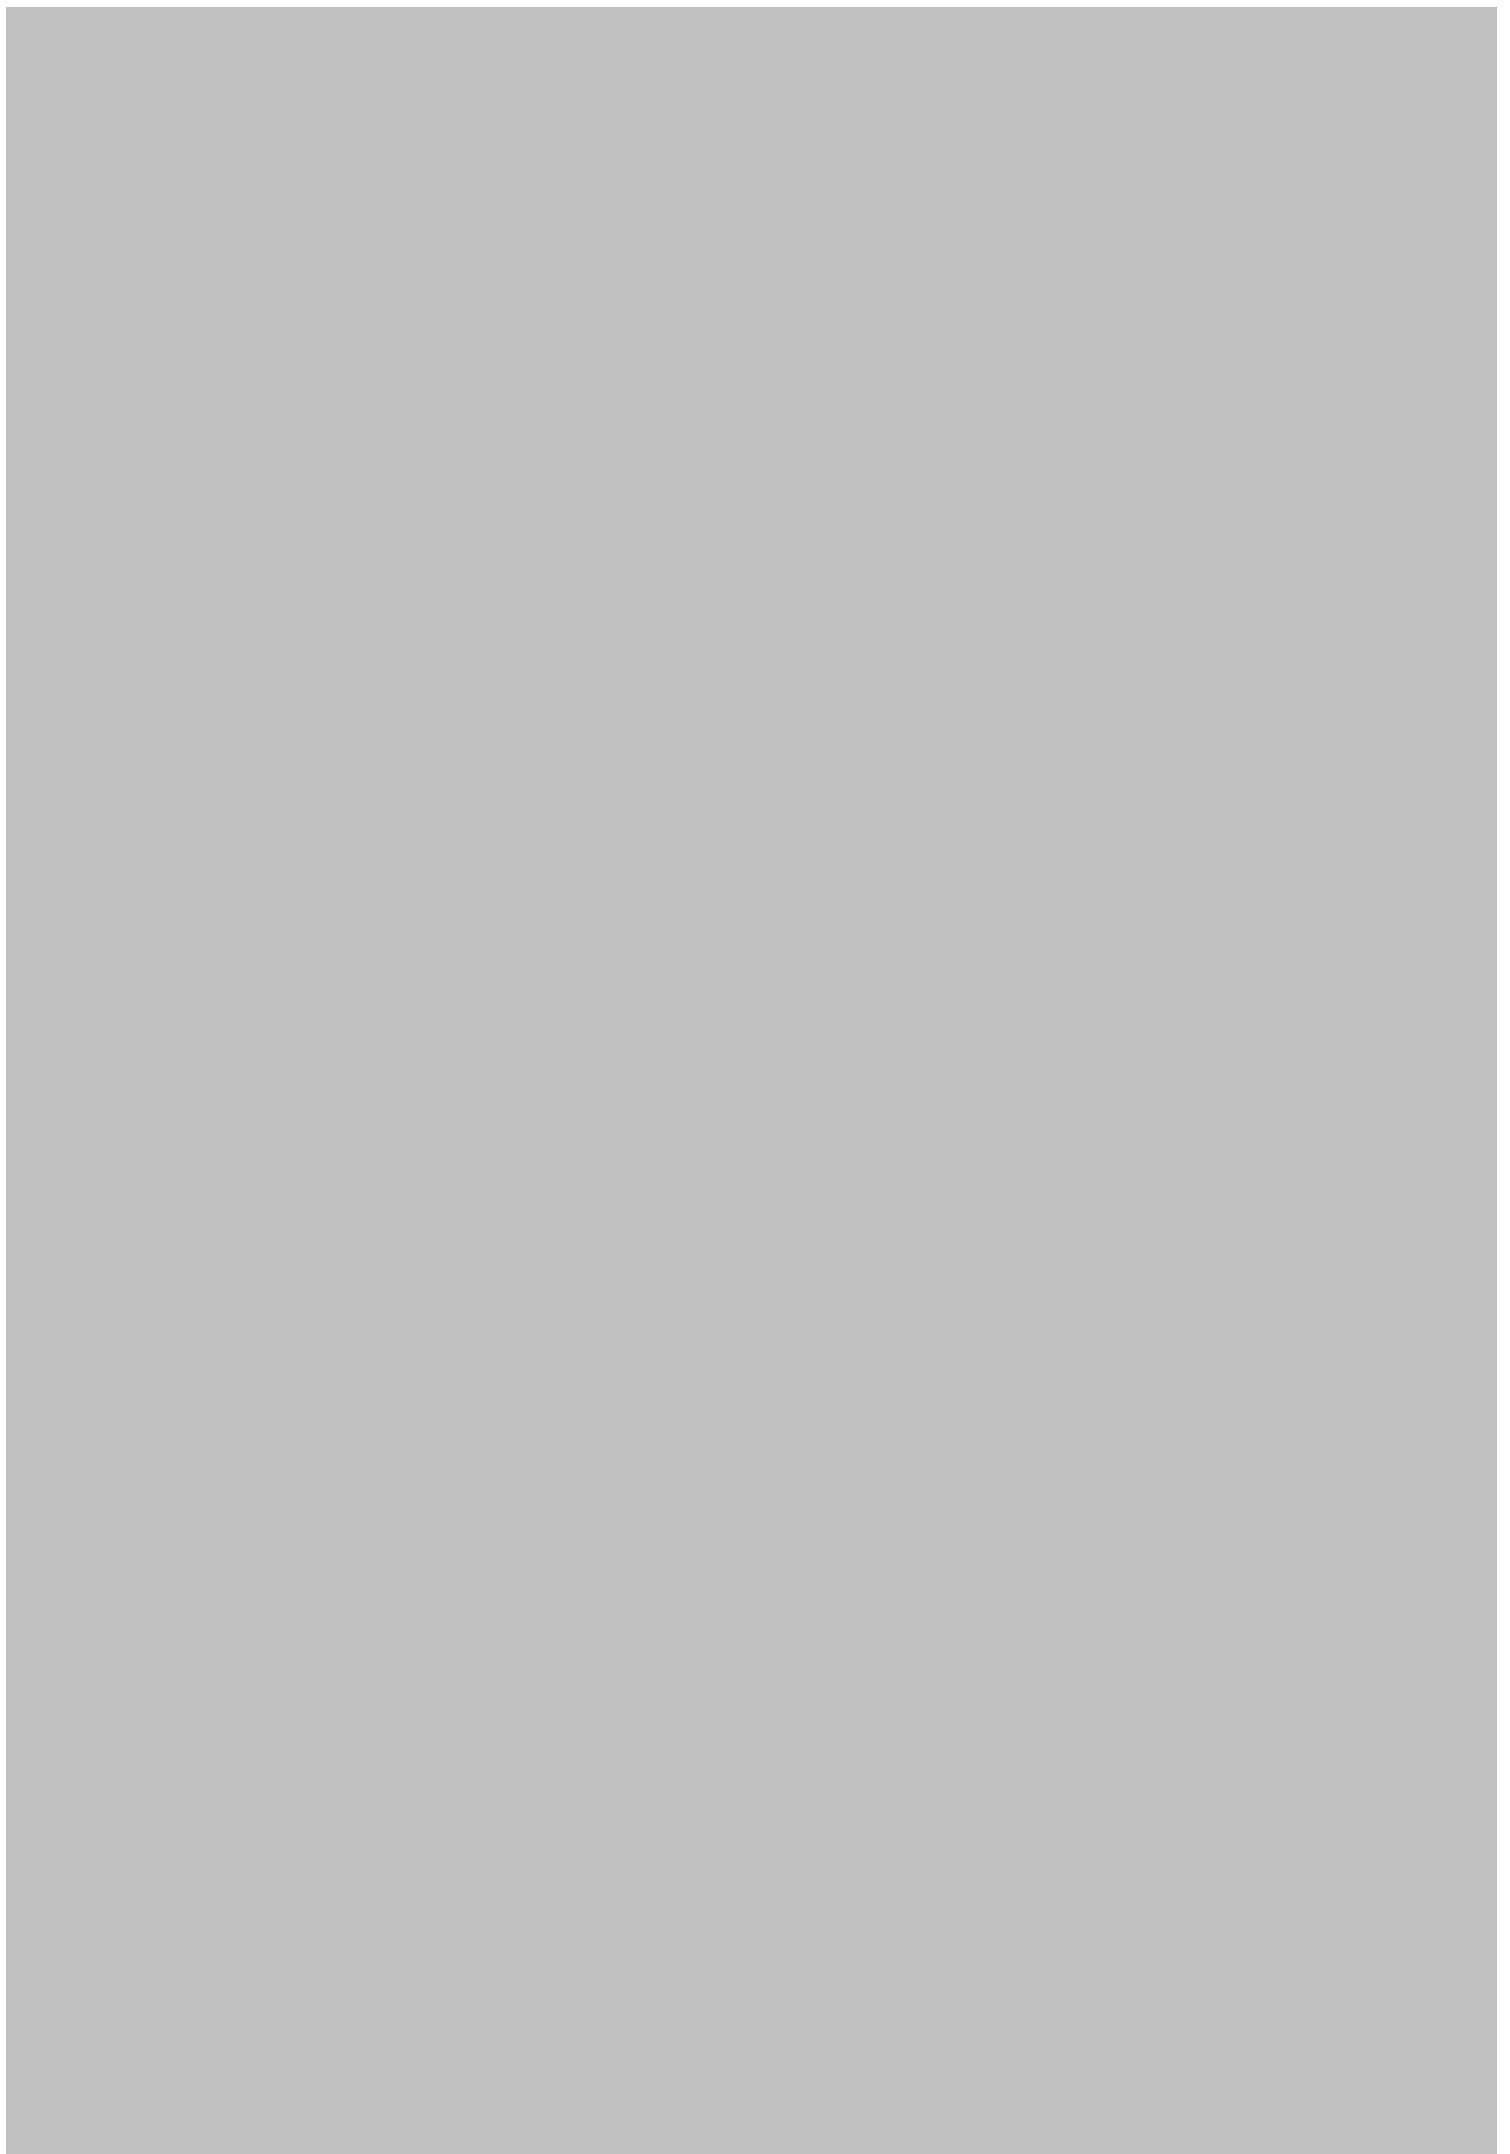

Die Veröffentlichung von entscheidungserheblichen Tatsachen und Erwägungen, hier geologische Daten, erfolgt nach dem Gesetz zur staatlichen geologischen Landesaufnahme sowie zur Übermittlung, Sicherung und öffentlichen Bereitstellung geologischer Daten und zur Zurverfügungstellung geologischer Daten zur Erfüllung öffentlicher Aufgaben (Geologiedatengesetz – GeolDG).

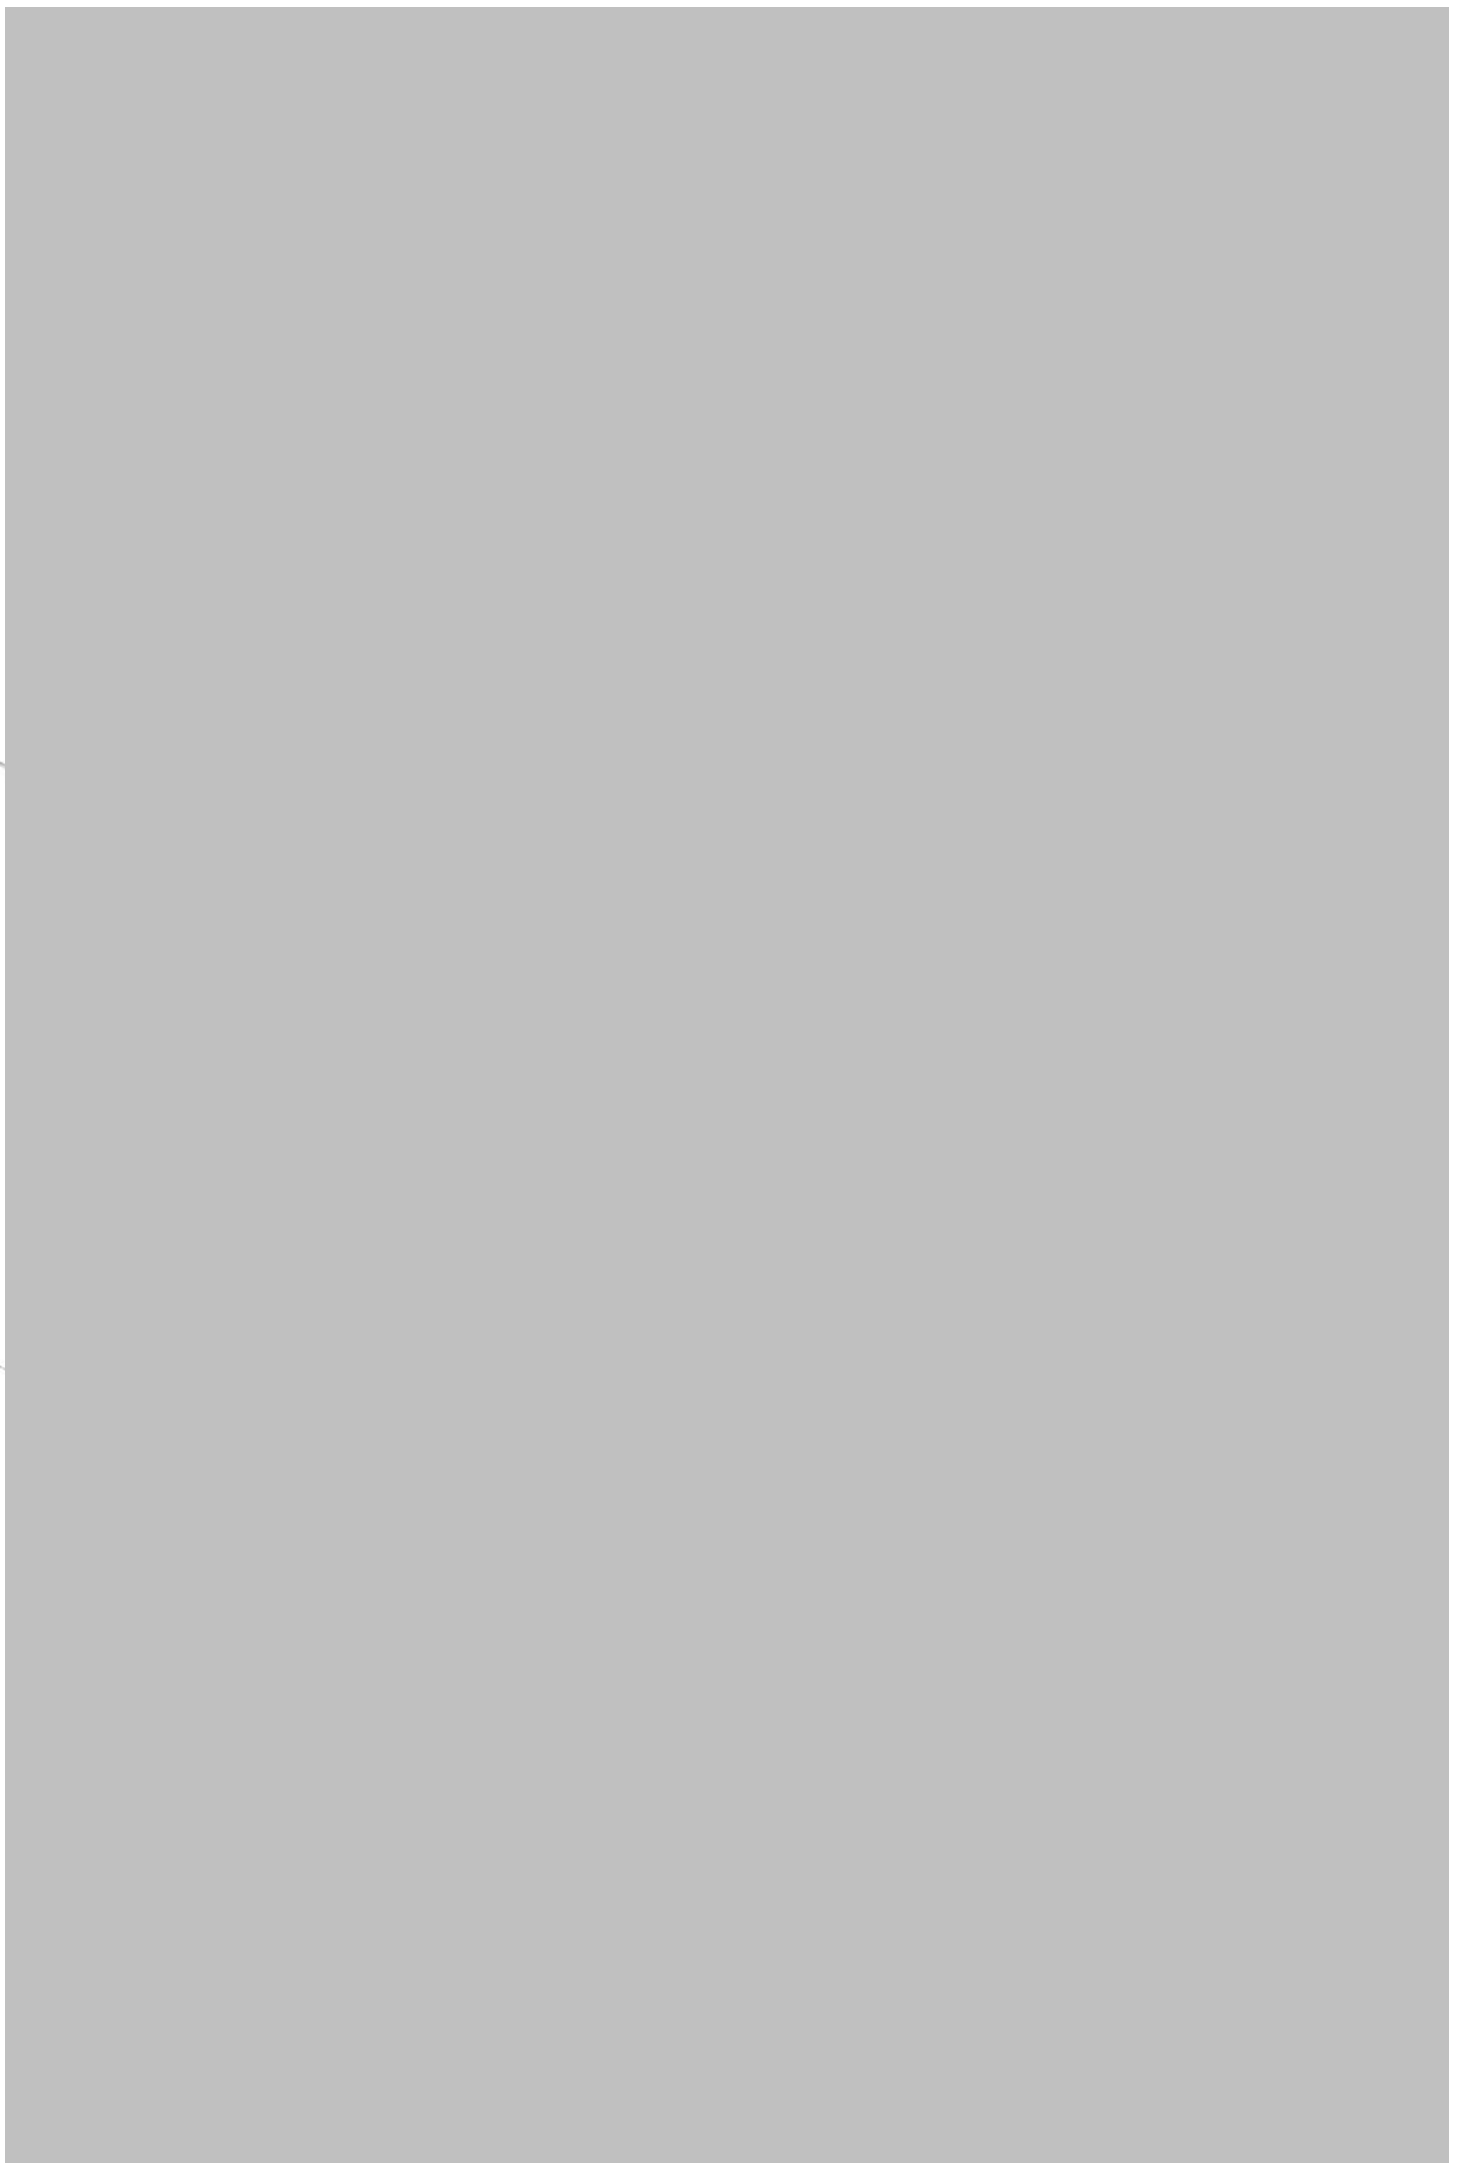

Das GeolDG löst das Lagerstättengesetz ab und nach § 1 GeolDG (GeolDG) regelt es die staatliche geologische Landesaufnahme, die Übermittlung, die dauerhafte Sicherung und die öffentliche Bereitstellung geologischer Daten sowie die Zurverfügungstellung geologischer Daten zur Erfüllung öffentlicher Aufgaben, um den nachhaltigen Umgang mit dem geologischen Untergrund gewährleisten und Geogefahren erkennen und bewerten zu können. Geologische Daten werden insbesondere auch für das Standortauswahlverfahren nach dem Standortauswahlgesetz (StandAG) benötigt.

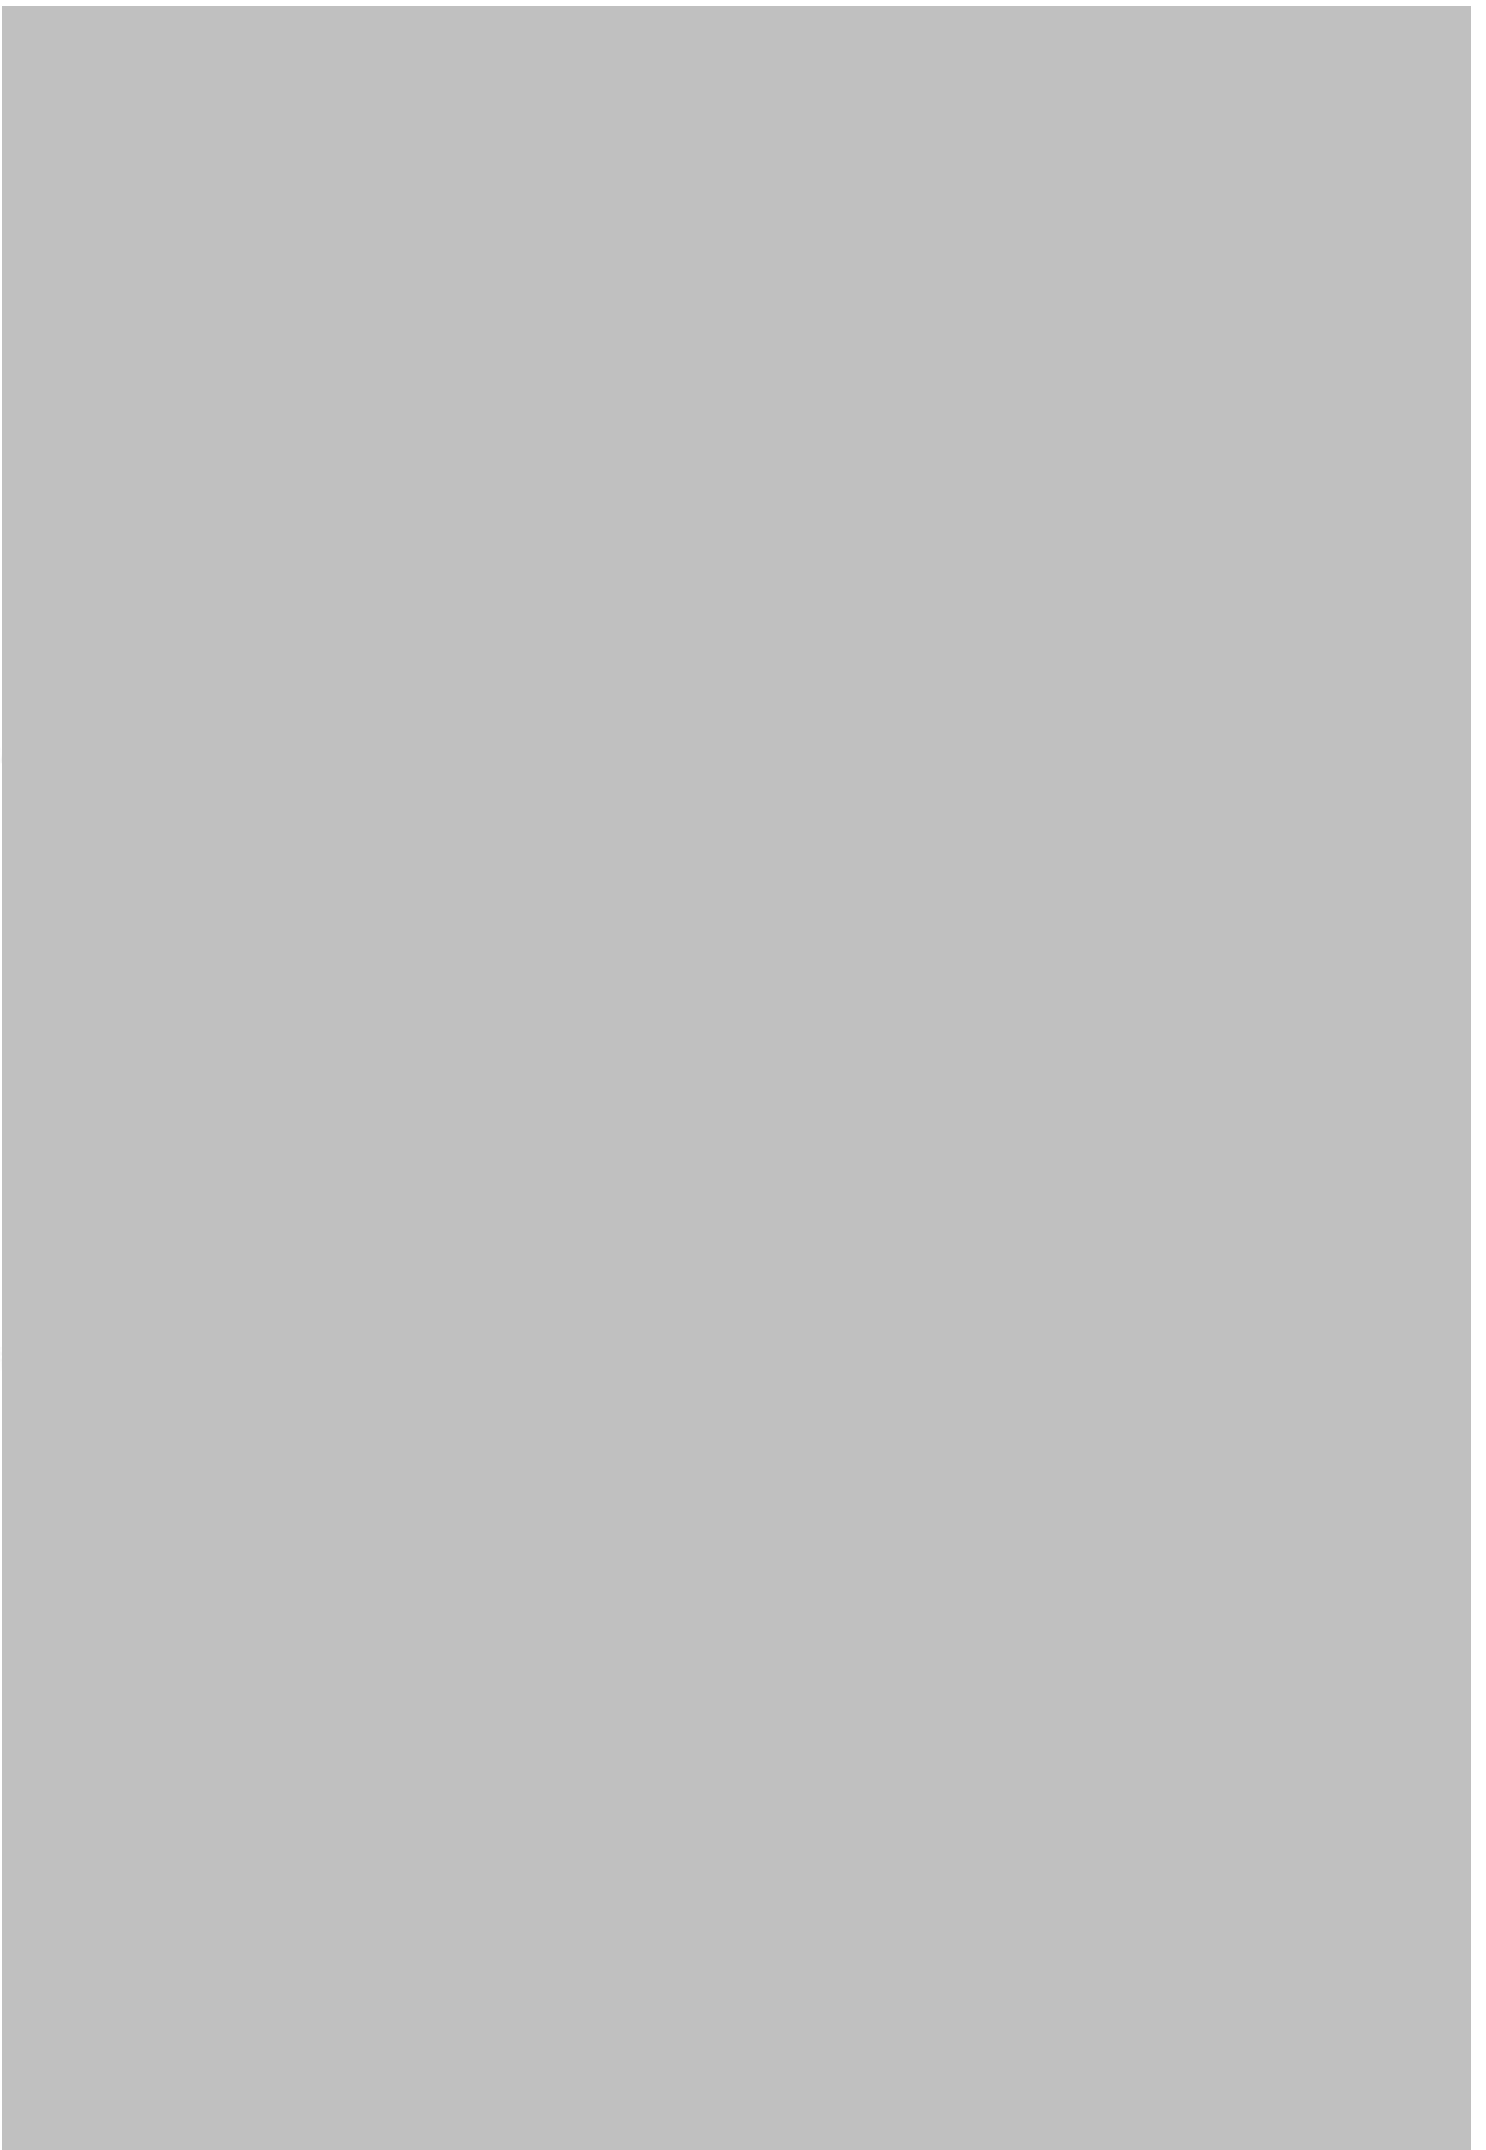

Das GeolDG trat mit dem 30.06.2020 in Kraft, so dass seitens der BGE, den Landesministerien und Landesbehörden ab diesem Zeitpunkt mit den Verfahren nach dem GeolDG zur Kategorisierung und öffentlichen Bereitstellung geologischer Daten begonnen werden konnte. Die erforderlichen Verfahren waren aufgrund ihres Umfangs nicht in dem bis zur Veröffentlichung bestehenden Zeitraum umzusetzen. Insofern werden nach dem 28.09.2020 weitere geologische Daten veröffentlicht werden. Die Veröffentlichung erfolgt mit Hilfe einer Revision des vorliegenden Datenberichtes. Dabei werden die bisher im vorliegenden Bericht weiß abgedeckten Bereiche nicht weiter abgedeckt, sondern die „darunter liegenden“ Daten sichtbar gemacht.

Mit diesen Anlagen sind der untersetzenden Unterlage (BGE 2020I) die entscheidungserheblichen Daten zu den Mindestanforderungen und geowissenschaftlichen Abwägungskriterien angefügt. Die darin angegebenen Koordinaten beziehen sich dabei immer auf die den identifizierten Gebieten und Teilgebieten zugrundeliegenden Daten und beschreiben damit nicht zwingend das Teilgebiet selbst.

the 1990s, the number of people with a university degree has increased in all countries, but the increase has been most dramatic in the United States.

There are two reasons why the increase in university graduates is important. First, it is a reflection of the fact that the demand for university graduates has increased. Second, it is a reflection of the fact that the supply of university graduates has increased. The increase in the supply of university graduates is a result of the fact that the number of people who attend university has increased.

The increase in the number of people who attend university is a result of the fact that the number of people who are able to attend university has increased.

The increase in the number of people who are able to attend university is a result of the fact that the number of people who are able to pay for university has increased.

The increase in the number of people who are able to pay for university is a result of the fact that the number of people who are able to work has increased.

The increase in the number of people who are able to work is a result of the fact that the number of people who are able to find work has increased.

The increase in the number of people who are able to find work is a result of the fact that the number of people who are able to be hired has increased.

The increase in the number of people who are able to be hired is a result of the fact that the number of people who are able to be employed has increased.

The increase in the number of people who are able to be employed is a result of the fact that the number of people who are able to be productive has increased.

The increase in the number of people who are able to be productive is a result of the fact that the number of people who are able to be educated has increased.

The increase in the number of people who are able to be educated is a result of the fact that the number of people who are able to be trained has increased.

The increase in the number of people who are able to be trained is a result of the fact that the number of people who are able to be taught has increased.

The increase in the number of people who are able to be taught is a result of the fact that the number of people who are able to be instructed has increased.

The increase in the number of people who are able to be instructed is a result of the fact that the number of people who are able to be mentored has increased.

The increase in the number of people who are able to be mentored is a result of the fact that the number of people who are able to be supervised has increased.

The increase in the number of people who are able to be supervised is a result of the fact that the number of people who are able to be managed has increased.

The increase in the number of people who are able to be managed is a result of the fact that the number of people who are able to be organized has increased.

The increase in the number of people who are able to be organized is a result of the fact that the number of people who are able to be coordinated has increased.

The increase in the number of people who are able to be coordinated is a result of the fact that the number of people who are able to be synchronized has increased.

The increase in the number of people who are able to be synchronized is a result of the fact that the number of people who are able to be aligned has increased.

The increase in the number of people who are able to be aligned is a result of the fact that the number of people who are able to be integrated has increased.

The increase in the number of people who are able to be integrated is a result of the fact that the number of people who are able to be unified has increased.

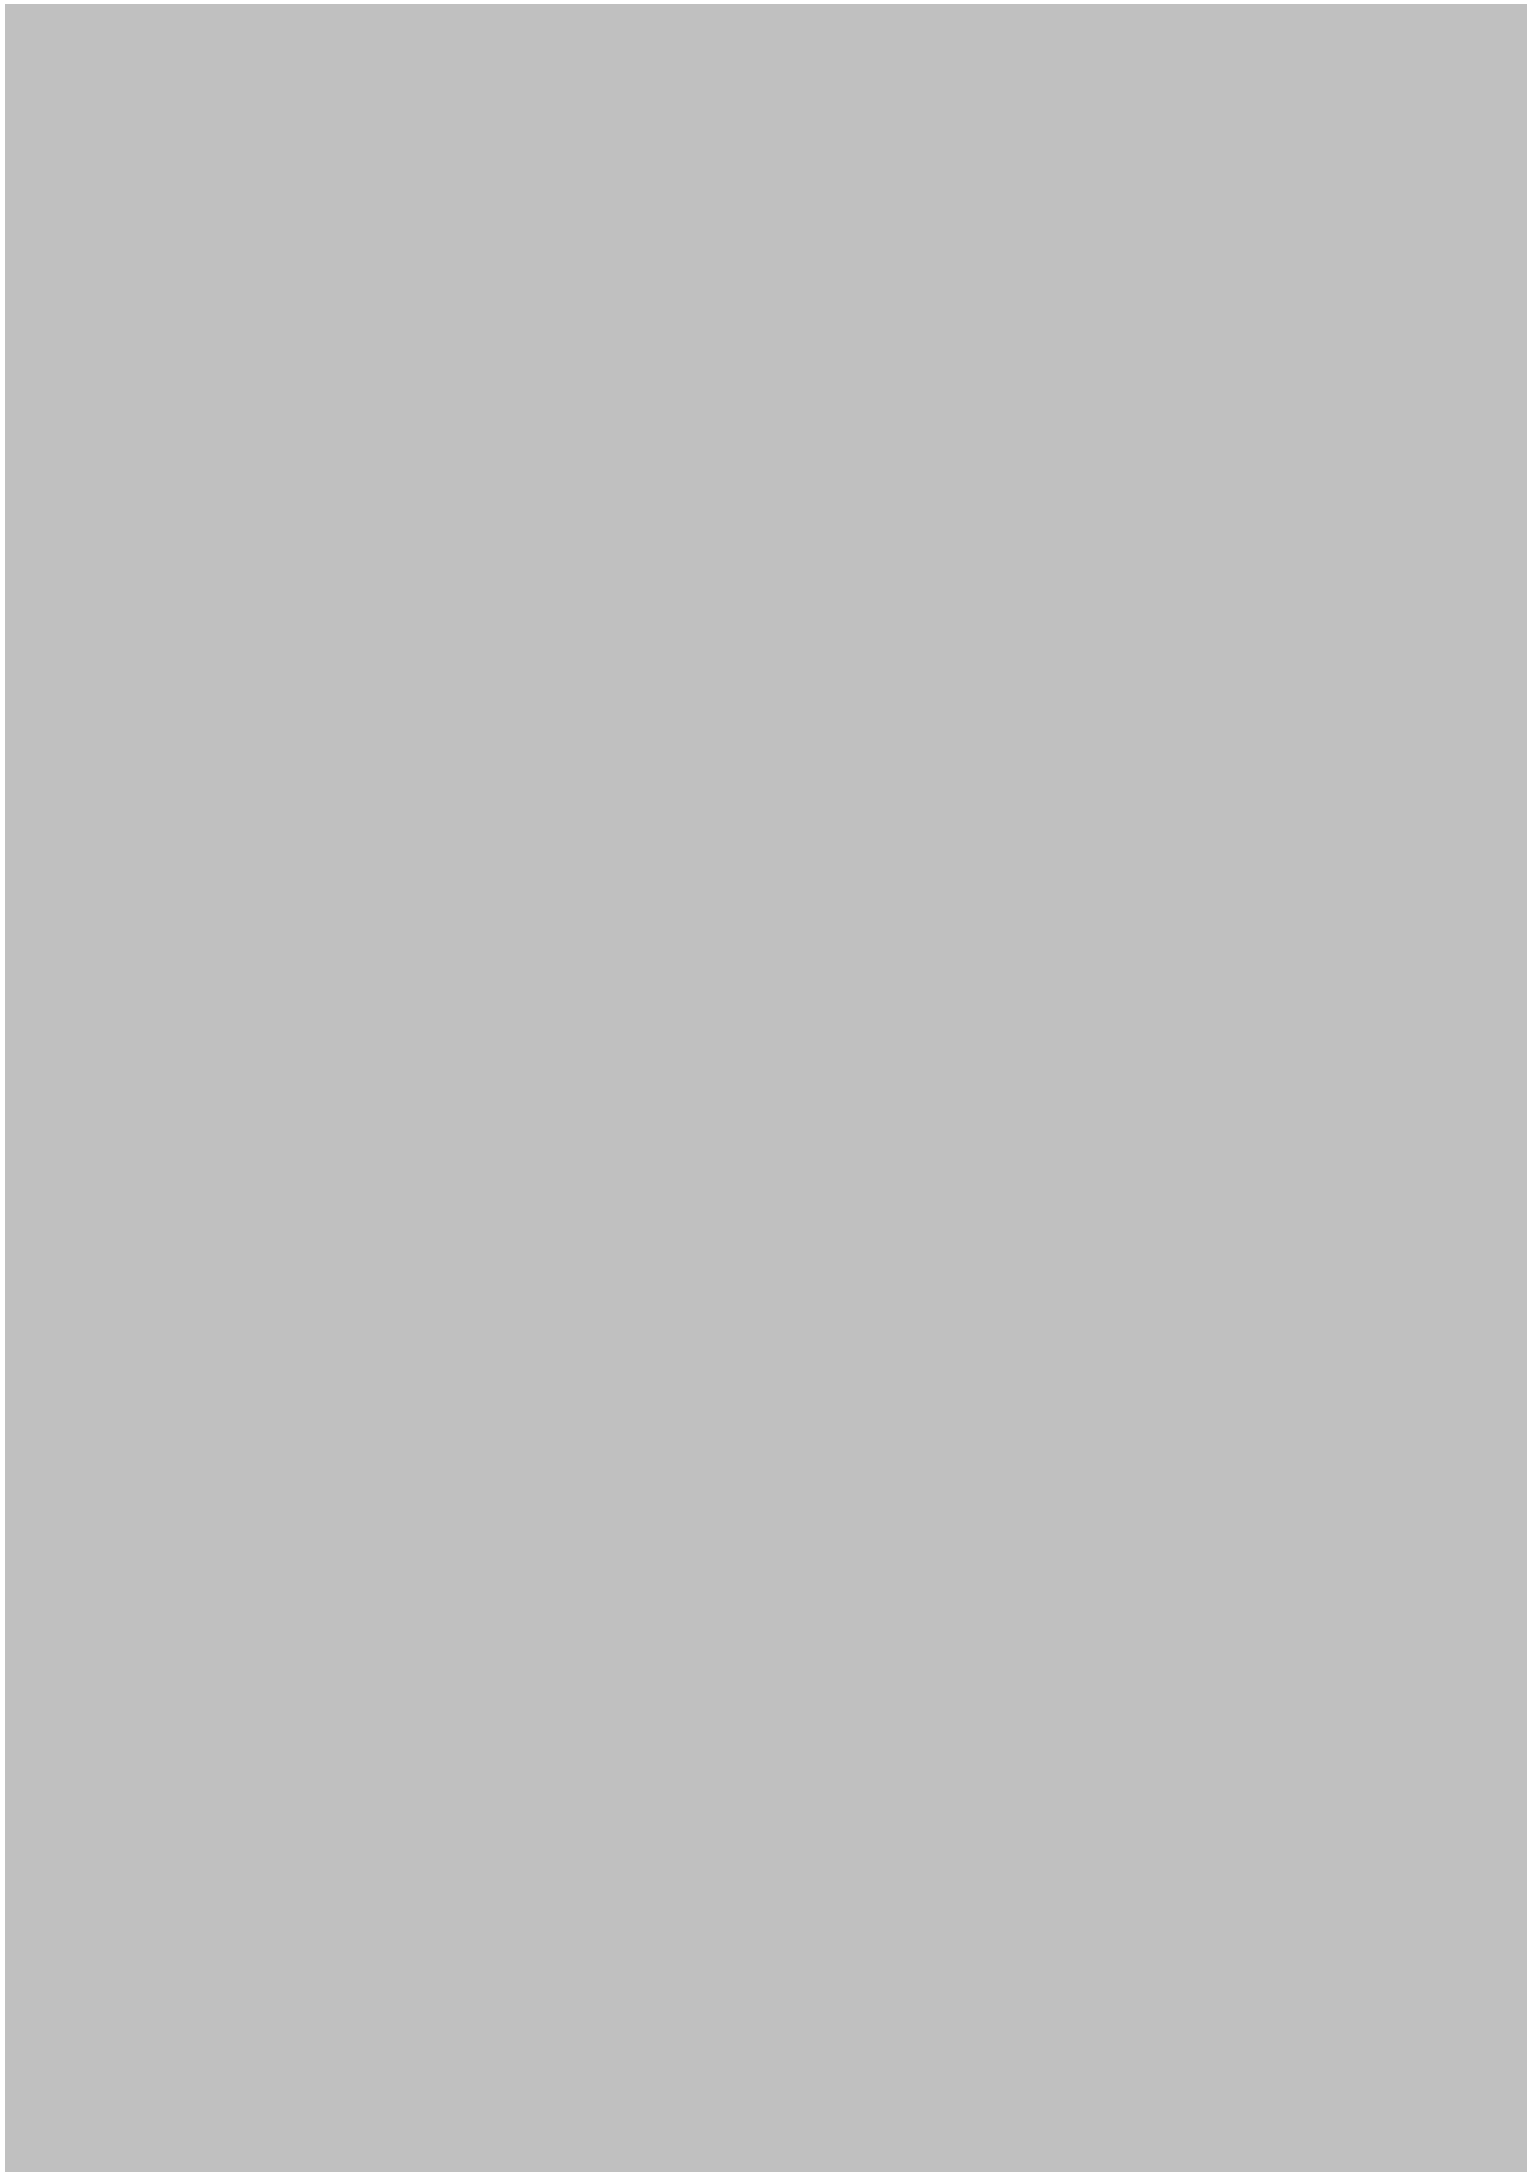

The increase in the number of people who are able to be unified is a result of the fact that the number of people who are able to be harmonized has increased.

The increase in the number of people who are able to be harmonized is a result of the fact that the number of people who are able to be balanced has increased.

The increase in the number of people who are able to be balanced is a result of the fact that the number of people who are able to be stable has increased.

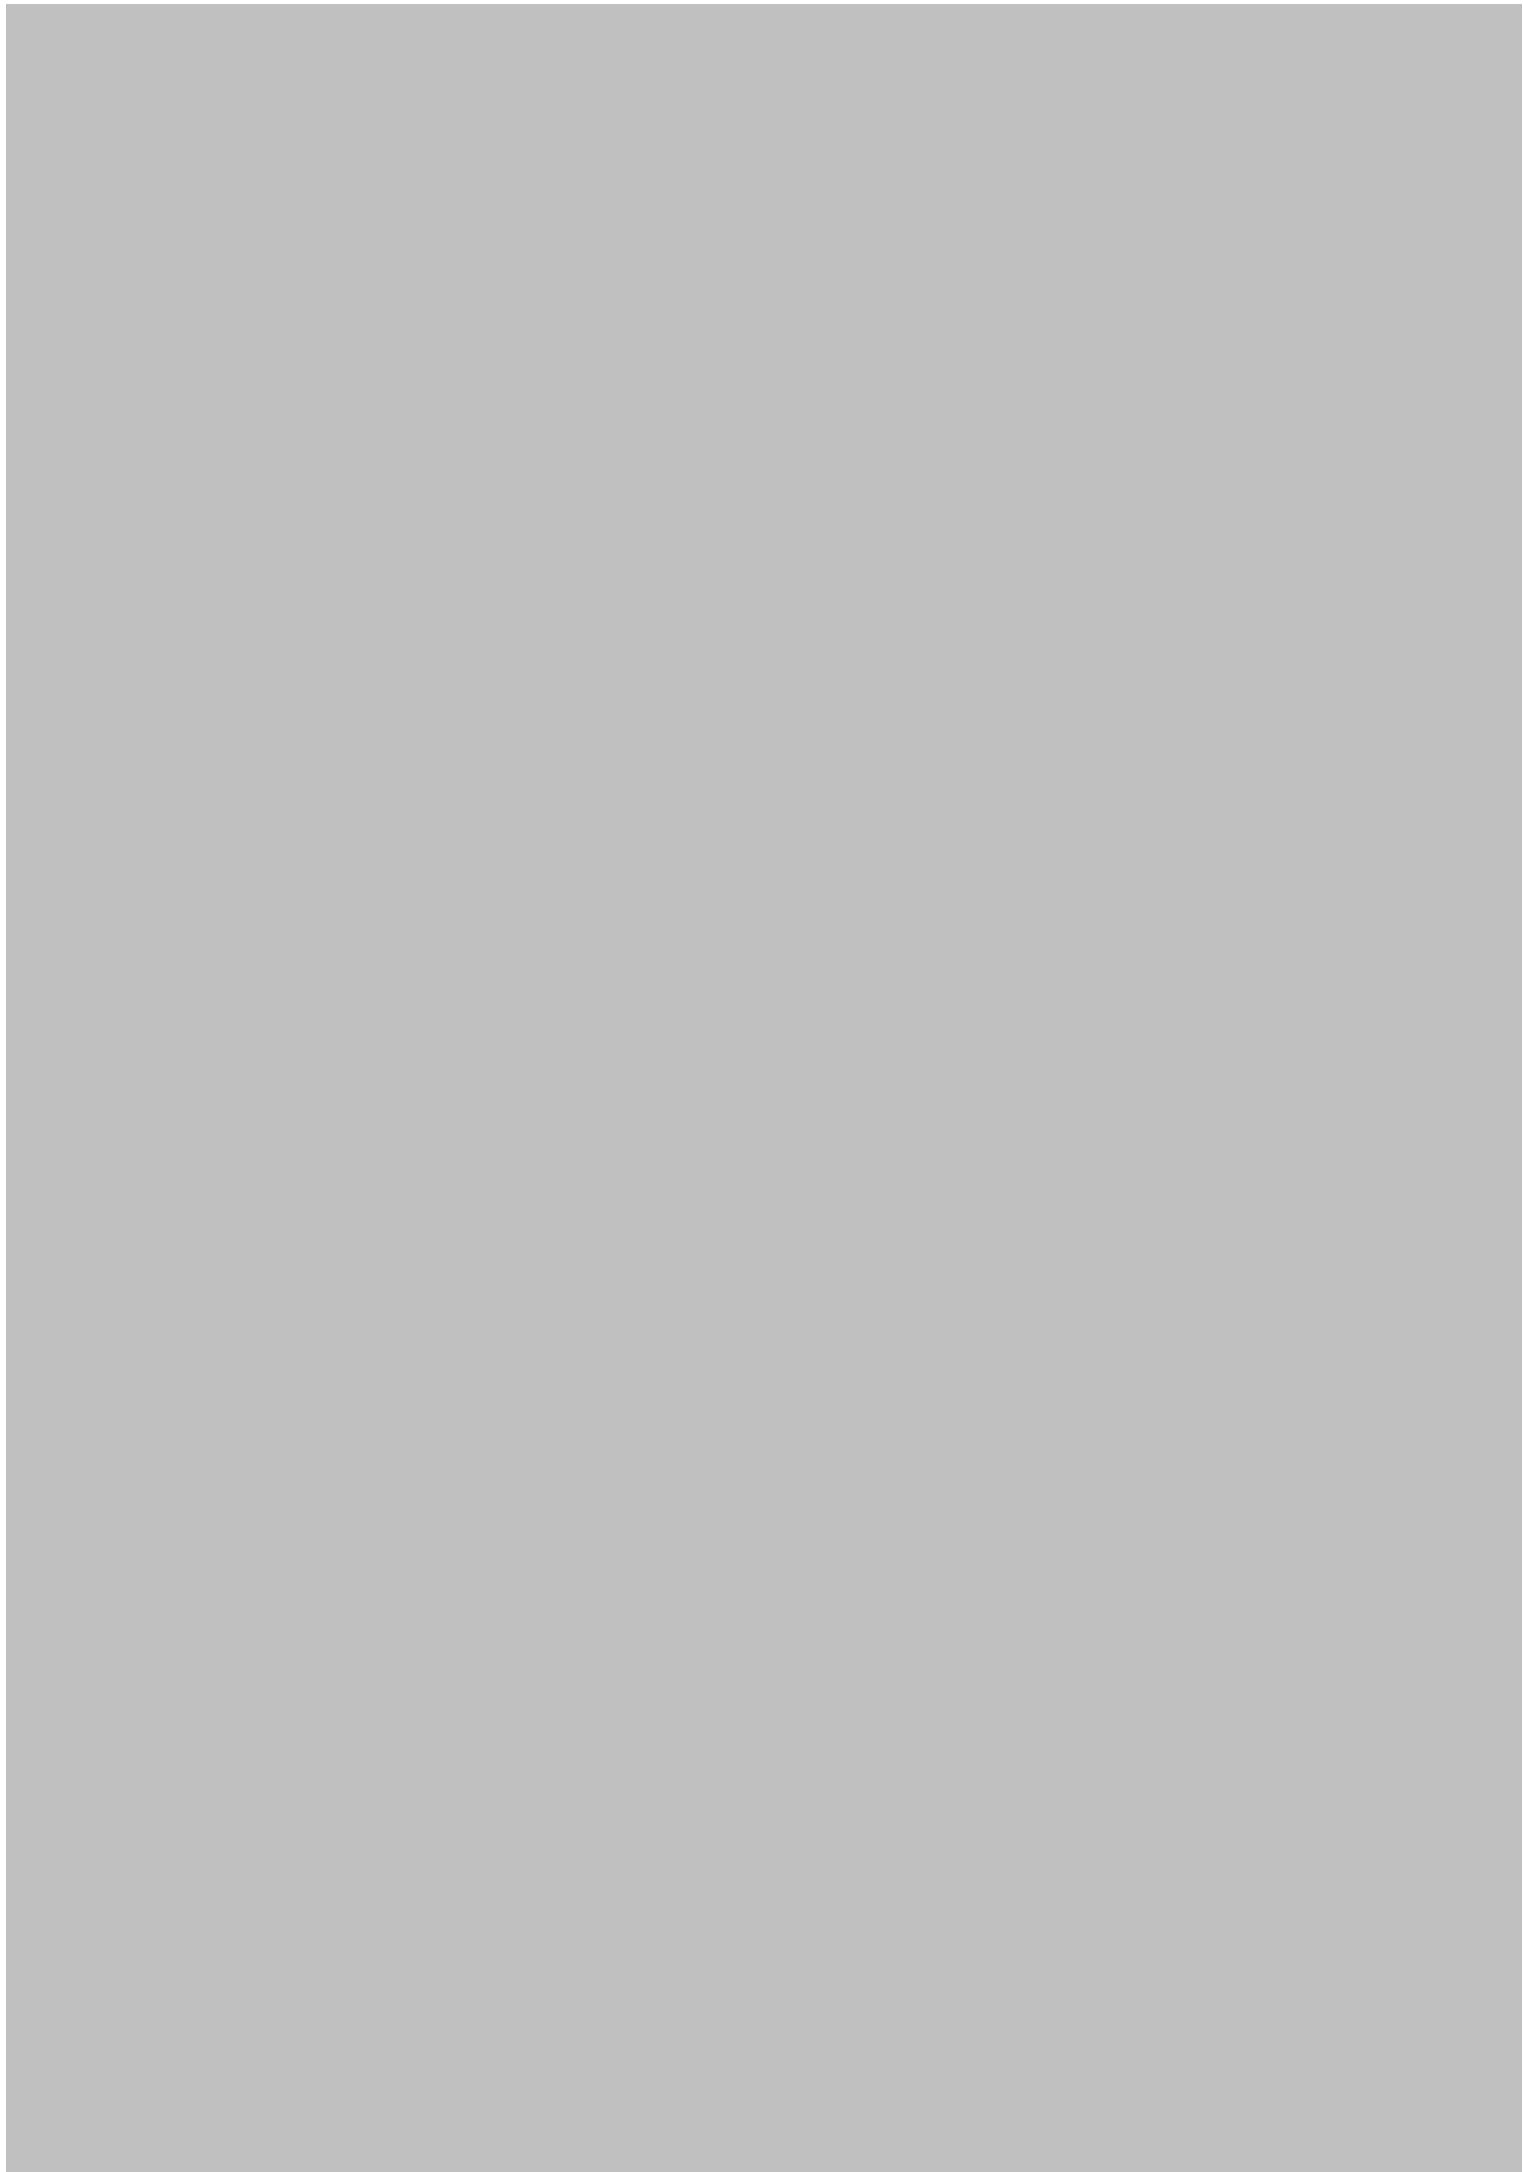

The increase in the number of people who are able to be stable is a result of the fact that the number of people who are able to be secure has increased.
